CAPABILITIES STATEMENT

Accentem Inc. is a leading provider of custom software and web development solutions, specializing in Microsoft technologies and integration with diverse databases. With over 25 years of experience, our team of skilled engineers is passionate about creating solutions that seamlessly meet your unique business needs and empower your growth. We want to build a lasting relationship.

SOFTWARE/WEB DEVELOPMENT EXPERTISE

MICROSOFT TECHNOLOGY

We leverage the power of Microsoft technologies like **.NET, ASP.NET, and Azure** to deliver robust, scalable software applications. Our expertise extends to building complex enterprise applications, mobile applications, and desktop software solutions.

DATABASE INTEGRATION

We have extensive experience working with various relational and non-relational databases, including **SQL Server, Oracle, MySQL, and MongoDB**. This allows seamless integration with your existing data infrastructure, ensuring efficient data management within your custom software.

CUSTOMIZABLE SOLUTIONS

We understand that every business has unique needs. Our collaborative development process allows us to understand your specific requirements and customize software solutions that **perfectly align** with your vision.

SECURITY & SCALABILITY

Security and scalability are paramount in today's digital landscape. We prioritize building secure applications that can adapt to your growing needs, ensuring long-term value for your investment.

OTHER EXPERTISE:

Empowering AI Capabilities, Cloud Application Development, Enterprise Resource Planning (ERP) software development and implementation, Geospatial Technology Expertise, Biometric Facial Recognition Integration

TECHNOLOGIES

- Copilot for Microsoft 365: Teams message extension, Business application plugins
- AWS: EC2, Lambda, S3, Elastic Beanstalk, API Gateway, Route 53
- Azure: Kubernetes Service, Container Registry, App Services, SQL Database, Storage, Cosmos DB
- ASP.NET Core Web API, LINQ
- Microsoft .NET, C#, WCF, WPF, Entity Framework
- Angular, HTML 5, RESTful APIs, JSON, PHP, PERL, JavaScript, jQuery
- Microsoft SQL Server, Oracle, MySQL, PostgreSQL, MongoDB, ArcGIS FileGeodatabase, ArcGIS SDE
- ArcGIS Enterprise, ArcGIS Desktop & Pro
- Docker
